The Board

Work Environment Investments

Background

In order to carry out the work expected of them to their fullest capacities, the newly elected LUS presidials are in need of new office furniture and office investments. These investments are of an ergonomical and practical nature and are long needed upgrades that previous presidials have not had the time to conduct. Amongst these investments, there is the need for a new office chair for LUS vice president, two docking stations for the presidials as well as a new phone for the president of LUS.

The docking stations and new phone are somewhat bigger investments, needed for work efficiency under this operational year, as well as the next to come. The lack of docking stations and currently outdated phone hinders the efficiency of the presidials, making work unnecessarily hard. For more detailed information about pricing and investment needed, see the table below.

Having discussed this, LUS board therefore suggests

that the LUS board should be allowed to make the investment of 25 960 kr, as suggested below.

that the money should be taken from the Inventariefond.

that if the money in the Inventariefond is not sufficient, any additional expenses should be filed under 6991, Diverse övriga kostnader

What	Price (kr)	Motivation for purchase
Display adapters	600	So the presidium can connect the laptops to projectors etc. The current ones are a bit broken.
Repair of president computer	1 000	There is a problem with the fan.
New minifridge	2 000	The current one is making a lot of noise.
2 Docking stations	6 000	LUS does not have any in the office.
New president phone	6 000	current one is old and does not work properly
Office Chairs	8 000	The current chairs are not particularly ergonomic.
