

## **Karolina Mothander – NanoLunds styrelse**

I'm name is Karolina Mothander and I'm a PhD student at Physical chemistry and I'm also part of NanoLund. At the NanoLund PhD retreat that we had in August I was elected by the other NanoLund PhD students to be the student representative during 2018. However, it now seems that we should redo the election because LUS should be the ones to elect the representatives. So, I'm still interested and think that I have a lot to offer the NanoLund PhD students, and also to contribute to the board meetings. I've previous experience being a student representative, I was the president of LUNA 11-12, been on a lot of different boards and right now I'm the student representative for my research school.
